

Accessories

Accessories for WEMA JOKER 7000 - Hydraulic copying lathes

Profile sharpening machine with diamond grinding wheel.

Sharpening machine, type BLITZ, for sharpening standard copying lathe tools (i.e. pointed tools). The double clamping device & precision depth adjustment warrant quickspeed resharping with a constant knife geometry.

Ring collar plate with adjusting spindle, pointed tools on both copying supports, hand rest for manual reparting.

Four-jaw collar plate, infinitely variable.

Rear view of machine with double scanning system, ball transfer guides on lathe base, feed motor, energy guide chain, template support with master pattern scanning and adjustment mechanism.

Accessories for WEMA JOKER 7000 CD - Copy turning and milling Machine

Milling unit with vertical cutter head.

Milling unit with horizontal cutter head.

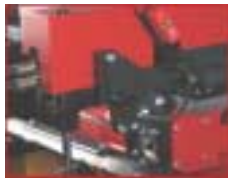

By use of 2 copy carriages, turning and milling can be made in one mounting.

copying from original

quick loading device

multi step depth device

2 copy carriages for large cutting operations extraction for copy carriage.

Four jaw steady infinitely adjustable in 3 dimensions 30-60 mm, 60-100 mm, 120-180 mm.

ring follower steady 15-75 mm or ring follower steady 80-130 mm with quick interchangeable discs

Profile sharpening machine with diamond grinding wheel and Sharpening machine BLITZ for copy lathe tools.

Accessories for WEMA JOKER 7000 CNC Controlled turning and milling Machine

program-controlled drilling unit

program-controlled tool changer with 4 tools

program-controlled pick-and-place unit

new drive system for high power transmission

Milling unit with horizontal cutter head

Milling unit with vertical cutter head

Four jaw steady infinitely adjustable in 3 dimensions 30-60 mm, 60-100 mm, 120-180 mm

ring follower steady 15-75 mm or ring follower steady 80-130 mm with quick interchangeable discs

Profile sharpening machine with diamant grinding wheel and Sharpening machine BLITZ for copy lathe tools.

Sharpening machine, type BLITZ, for sharpening standard copying lathe tools (i.e. pointed tools).
