### WEMA MINIMAT 25 - Automatic small components lathe

The „high season“ for the fabrication of turned parts began with the **WEMA MINIMAT** series.

Now the latest addition to our range is the minimat 25 which turns up to 44 mm in diameter, bringing the range full circle.

---

### WEMA MINIMAT 45 - Automatic small components lathe

It is possible to use up to 4 work supports when turning complicated shapes.

**The high season for the fabrication of turned parts began with the WEMA MINIMAT series.**  
Now the latest addition to our range is the minimat 45 which turns up to 44 mm in diameter, bringing the range full circle.

---

### WEMA MINIMAT 65 - Automatic small components lathe

Our **WEMA MINIMAT 65** is an addition to our range of high production small components machines.

All our lathes are renowned for their quality of manufacture incorporating the latest technology, ease of operation, fast production rates and good profitability. The machine is compact in size and requires very little floor space.
