

Grinding and boring Machine

WEMA PROFISANDER 2000 Grinding and Boring Machine

PROFISANDER 2000 belt grinding and boring Machine

The characteristic features of the **PROFISANDER 2000** are its versatile use, economic efficiency and solid design. This all-round machine is not only ideal for sanding veneer edges but also for grinding curves, mitre joints, bevels and broken edges, for fitting drawers and for sanding the surfaces of small workpieces.

WEMA Center drilling Machine

Center drilling Machine with manuell feed

High precision by linear guidance.

WEMA UNIVERSAL DRUM TUMBLER

UNIVERSAL DRUM TRU

Our **UNIVERSAL DRUM TRU TUMBLER** forms essential part of a many-sided program **WEMA MINIMAT**. Modern principals of construction, multiplicity of employment and comfort of operation are in the same way important as extreme profitability in case of slightest local requirements.
