

## Our trade fair participation

### Flashback to LIGNA Exhibition in Hanover/Germany

Also this year we could welcome many customers and visitors on our booth in Hanover. Many customers showed great interest on our **CNC Woodturning Automatic Machine WEMA CONQUEST**. This machine produced stair spindles during the fair. Also on all other exhibited machines **WEMA JOKER 7000-300** and **WEMA MINIMAT 65 NC** we produced parts.

This year we had more visitors from the countries Russia, Turkey, Israel, United Arab Emirates, Hungary, Rumania and Austria and less visitors from United States of America and Canada. Alltogether we were satisfied with all the contacts and the visitors who came to see our machines working during the fair. We also had a visit from a TV station, which made a film from our WEMA machines. This film will be presented from the television station N 24 soon.
