

Our trade fair participation

Holz-Handwerk in Nuremberg from 24th – 27th March 2010

We also exhibited our WEMA woodworking machines in Nuremberg this year. We did not have as many visitors as in earlier years. Also many exhibitors did not show their products.

We had good contacts and could also reach several orders.

Besides our machines WEMA JOKER CNC and all other lathes, we showed the further development of our **Small components lathe WEMA MINIMAT 65 into MINIMAT 65 NC:**

All customers showed big interest in this development. All existing MINIMAT 65 can be modified to the newest model 65 NC

A special information about the new WEMA MINIMAT 65 NC you find under "Newsletter"

Our next foreign exhibition is the
IWF in Atlanta, USA
from 25th – 28th August 2010

We will report after the fair.
