

WEMA UNIVERSAL DRUM TUMBLER

Our UNIVERSAL DRUM TRU TUMBLER forms essential part of a many-sided program WEMA MINIMAT.

Modern principals of construction, multiplicity of employment and comfort of operation are in the same way important as extreme profitability in case of slightest local requirements.

Grinding and buffing drums form part of the basic equipment of a work-shop.

Our drum unit is provided with a rotating bearing with a interchangeable drum and a number of re- volutions infinitely variable. Therefore the drum is suitable to all ranges of application you can imagine.

Compact construction in prime, service-kind workmanship.

Possibility of using a table or support version for surface treatment of small wooden pieces or other materials.
